DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacquin (IDS cited reference USP 6,575,171) in view of Warner et al (USP 5,339,477).

Jacquin discloses a nail polish removing device (figs. 12-14) comprising a container (400) including a nail polish removing solution compartment (50), an opening (20) adapted to receive a portion of a foot to be cleaned in a lateral manner, a porous and pliable medium (25) being in contact with the solution (see fig. 1); the container further having a ledge (15, col. 3, lines 45-51) for resting the user's foot, the ledge being disposed at bottom of the opening, a cover (131) for sealing the compartment (50) against a loss of the solution. The nail polish solution being transferred from the compartment to the porous member by a pump (55), the solution is uniformly absorbed in the porous member by a combination of agitation which caused by rotating action of the porous member and capillary action. The device further having legs (see fig. 5) to support the device. Jacquin fails to show the porous member having a slot and the container being made of plastic. Warner et al discloses a nail polish removing device (fig. 3) comprising a sponge member (80) with a slot or cavity (86) dimension to receive the foot or finger to be cleansed. It would have been obvious to one having an ordinary

Art Unit: 3732

skill in the art at the time the invention was made to employ the sponge with the slot as taught by Warner et al into the device of Jacquin as an alternative way of removing the nail polish. And it would have been obvious to one having an ordinary skill in the art at the time the invention was made to construct the container with plastic material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson is cited to show the state of the art with respect to a nail polish removing device with an opening adapted to receive a finger in a lateral manner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robyn Doan whose telephone number is (571) 272-4711. The examiner can normally be reached on Mon-Fri 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cris Rodriguez can be reached on (571) 272-4964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
